

PROFILE

A result driven professional 3D Technical S with 14+ years of progressive experience in game development, Visualization, 2D & 3D Animation, 3D assets creation for mobile App development and AR, VR and MR applications.

Team player dedicated to helping employees to improve their skills and techniques to reach larger goals.

Excellent at analyzing team strengths and leveraging individual assets to reach business goals efficiently.

EMAIL:
venkatesh.3dart@gmail.com

STRENGTH

Smart work
Punctuality
Dedication
Proper planning to complete the projects on time

HOBBIES

3D Modeling
Animating
Swimming
Reading
Trucking
Update new technology

VENKATESH RN

3D TECHNICAL SPECIALIST

SUMMARY OF SKILLS

- Significant experience in leading a team of 3D artists and developers in the pipelines.
- Extensive 3D Architectural visualizations & Animations.
- Expert knowledge in creating realistic walkthroughs and still 3d graphics for Interiors and Exteriors
- Extensive experience in product visualizations.
- Extensive knowledge in 3D assets optimization for Real-time & VR applications.
- Exposure in VR & MR Training applications.
- Exposure in UI UX design in Adobe Figma.
- Familiar in rigging & animation.
- Excellent Analytical skills regarding 3D model optimization.
- Good Exposure in R&D and Challenges in various 3D pipelines. & visualization
- Well expertise in lighting & rendering.
- Ability to foster positive, collaborative relationships
- Familiarity with Physically Based Rendering (PBR) material creation.
- Expert knowledge of common production tools such as Adobe suite, Autodesk Maya & 3DS Max, Blender, Keyshot & Lumion.
- 3D modeling and animation experience in Maya.
- Proficient in After Effects, and Adobe Premiere Pro.
- Deep understanding of the technology and techniques relevant to the department disciplines (digital workflows, simulation, physics, shading, rendering technologies).
- Experience leading project teams, training and developing individuals, ability to influence without authority.
- Working with teams for 3D data creation of various projects.
- Ability to work well in both a team environment as well as an individual environment.
- Ability to communicate technical data to non-technical colleagues.

SKILLS:

Technology	Architectural Visualization & Animation, Digital Twin, Walk-through & Fly-through Animations, Virtual Reality, Augmented Reality, Mixed Reality and eLearning multimedia
Software	Unity3D, Unreal, Autodesk Maya, Autodesk 3ds Max, Key shot, PiXYZ Studio, Substance Painter, Vray, Twin motion, Corona, DragonBones, Blender, MS office, , JT2Go, Adobe Suit, Lumion, Adobe Figma
Operating System	Mac OS X, Windows OS.
Animation	2D Animation, 3D Animation.

PROFESSIONAL SUMMARY:

- Having professional 3D pipeline experience in Unity3D Application Development based on Augmented and Virtual Reality.
- Specialization in creating Architecture interiors, exteriors, walkthroughs in 3ds max from AutoCAD drawings.
- Developing high quality 3D images.
- Have a very good experience in migrating 3D assets into AR, VR and MR based applications.
- Very good knowledge in Unity3D lighting & rendering.
- Exceedingly good experience in 3D assets optimization.
- Exceedingly well in product rendering & visualizations.
- Well expertise in creating optimized 3D assets for iOS and Android applications.
- Extended knowledge in Creating proof of concept's in 3D.
- Exceedingly good experience in handling CAD for animation & visualization.
- Exceedingly good experience in 3D rendering and architectural visualization.
- Moderate experience in Adobe Suite and Autodesk.
- Extended knowledge in creating animations.

Devices:

- Oculus Rift, Oculus Rift S, Oculus Go (VR Device), Leap Motion
- HTC Vive (VR Device).
- HoloLens 1 and 2 (MR Device)
- Magic Leap (MR Device).
- iOS and Android (AR Device)

KEY SKILLS:

- Ability to quickly move from one task to another.
- Ability to cope under pressure.
- Be able to take charge as the sole 3D resource of a team.
- Knowledge of most areas of the industry.
- Good communication skills.
- Reliable.
- Able to manage workflows efficiently and priorities tasks when needed.
- Logical thinking.
- Data & Passion driven.
- Always ready to assist a coworker.

SOFTWARE:

- Software Unity3D, Autodesk Maya, Autodesk 3ds Max, PiXYZ Studio, Substance Painter, Vray, Corona, , Spine2d, Dragon Bones, Blender, MS office, Keyshot, JT2Go, Adobe Suite and SAP visual enterprise, Figma.
- Operating System Mac OS X, Windows OS.

EDUCATION:

Tamilnadu Open University (TNOU)

(2007 – 2009)

BCA (Computer Applications)

Animaster college of Animation and Design

2009 - 2010

Advanced Autodesk Maya certification

Google Professional Certification

2023 - 2023

UX Design Professional Certification

WORK EXPERIENCE:

HCL Technologies, Chennai (July-2022 – Present)

3D Technical Specialist

- Handling the team of 3D artist & developers.
- Creating project timeline & estimation.
- Creating 3D digital twin assets and animations for the AR, VR, MR & XR applications.
- Optimizing 3D assets for application development.

- Animating 3D model.
- Unwrapping and texturing 3D models.
- Lighting and rendering 3D environments.
- Baking textures and light maps.
- Creating life like hard surface 3D models.
- Animation hard surface models
- Organizing 3D assets into manageable libraries to use ease of use in future projects.
- Working with Project Manager and Project Lead to execute their vision.
- Supervising projects & executing special techniques alongside other artists to ensure an outstanding final product

Mindtree Ltd, Chennai (Dec-2021 – July-2022)

3D Technical Lead

- Creating 3D Assets for visualization.
- Unwrapping & Texturing the 3D Assets.
- Creating 3D Character Animations.
- Creating Facial Blend shapes for 3D Avatars.
- Creating life like hard surface 3D models.
- Animation hard surface models
- Baking textures & light maps.
- Creating 3D proof of concepts.
- Client meetings & demo regarding POC.

Caresoft Global private Limited, Pollachi (May-2021 - Dec-2021)

3D Technical Lead (AR/VR/MR).

- Converting CAD data into polygon data for VR benchmarking application.
- Creating 3D assets and animations for the AR & VR applications.
- Working with Project Manager and Project Lead to execute their vision.
- Supervising projects & executing special techniques alongside other artists to ensure an outstanding final product.
- Creating and organizing 3D assets into manageable libraries to use ease of use in future projects.
- Creating 3D photorealistic 3D environments.
- Material creations and tweaking inside Unity3D to achieve life like visuals.
- Lighting and rendering 3D environments and products.
- Textures and light map baking regarding the FPS in Unity3D without compromise in quality.
- Storyboarding the concepts in power point to ensure pipeline and parallel workflow of the projects.
- Managing and supervising the team of artist and developers to ensure the delivery of final product.
- Participated in continuous improvement by generating suggestions
- Engaging in problem solving activities to support teamwork.

- Creating videos for learning and marketing purpose.

3D Consultant & Freelancer (July-2019 – May-2021)

3D Consultant / 3D Animator / 2D Animator

- Creating Animations for 2D & 3D characters and props.
- Creating photo realistic 3D architectural walkthrough & flythrough for exterior and interior spaces.
- Creating and optimizing 3D assets for augmented reality and Virtual reality training applications.
- Lighting and rendering photorealistic baked environment in Unity3D.
- Animating 3D and 2D characters and props for games and educational training videos.
- Creating high resolution architectural renders.
- Creating storyboard for applications.
- 3D and 2D assets optimization for AR, VR & MR application
- Storyboarding concepts in power point.

Caresoft Global private Limited, Pollachi (Oct-2017- July-2019)

3D Visualizer

- Converting and optimizing CAD into polygon mesh for AR and VR applications.
- Producing 3D environments for virtual reality applications.
- Texturing and texture map baking 3d models.
- Lighting and rendering the environments and products.
- Light map baking.
- Creating photo realistic materials in Unity3D.
- Storyboarding concepts and creating preliminary visuals.
- Animating characters, automotive and engineering parts.
- Creating photorealistic rendering for products and environments.

SRG United Solutions (March-2012 – Oct-2017)

3D Generalist

- Developing 3D assets for iOS and android games.
- Optimizing 3D assets for mobile game development.
- Animating 3D model for game development.
- Unwrapping and texturing 3D models.
- Lighting and rendering 3D environments.
- Baking textures and light maps.
- Creating photo realistic 3D architectural rendering for both exterior and interior.
- Converting high poly models into low poly.

Mixed Reality Application:

- **Intel HoloLens MR Application:**

Objective

Capture knowledge about complex repair & Maintenance procedures from highly experienced technicians and utilize data to reduced errors, risk of delays due to interruption of workflow.

- Reduced risk of poor maintenance
- Open to errors risk reduced
- Accelerated timelines for evaluation and feedback

Benefits

- Interactive training and assessment thru MR assisted platform
- Reduce learning curve and downtime - either new to the industry or inexperienced
- Step-by-step guidance with visual and audio feedback
- Improve efficiency of assets (Man & Machine)
- Real time simulations will make the factory line more productive and avoid bottlenecks to maximize efficiencies

- **Virtual Factory - Visualization and Simulation:**

Objective

To analyze the proposed modifications or feasibility of deploying new equipment for optimal spatial layouts

- Reduced risk of poorly optimized use of space
- Accelerated timelines for evaluation and feedback

Benefits

- **Layout planning and Visualization** - view the layout, overlaid on physical space and check if it is executable
- **Real time simulations** will make the factory line more productive and avoid bottlenecks to maximize efficiencies
- **Reduced risk** with virtual mannequins for ergonomic assessment of work environments

- **Repair and Maintenance:**

Objective

Capture knowledge about complex repair procedures from highly experienced technicians and utilize data to reduced errors, risk of delays due to interruption of workflow.

Benefits

- Interactive training and assessment thru AR / VR assisted platform
- Reduce learning curve and downtime - either new to the industry or inexperienced with a particular repair procedure
- Active collaboration between geographically separated personnel
- Step-by-step guidance with visual and audio feedback during training sessions to provide real time feedback
- Improve efficiency of assets (Man & Machine)

- **VR Car Benchmarking (CAD converted model):**

Objective

Developed for Customize the full car architecture and view car subsystems using implode and explode view. This app has Cross section the full car and enables the opacity mode in walkthrough. Used Local SQLite database fetching every part information in exploded view.

Benefits

- Walk around the environment and see the product in different orientation.
- Explore the Vehicle Architecture and view the internal components by controlling the opaque value.
- Assemble and Disassemble (subsystems)
- Grab parts and View part information's of subsystem
- Cut section view of the parts
- View electrical component and connector information with reference 2D drawing

- **Cornea Multiplayer App (CAD optimized 3D model):**

Objective

- The objective is to enable product development team to virtually collaborate and perform design reviews using optimized 3D model.

Benefits

- Visually inspect design clearance and evaluate design parameters for ease of manufacturing
- Perform virtual assembly validation without waiting for the completion of design and without prototypes
- Evaluate whether the target parts/assembly are visible/reachable/ accessible for serviceability
- Collaborate with remote teams to efficiently communicate technical details
- Perform frequent design reviews to improve the quality of the model
- Visually inspect clearance & check interference
- Evaluate design for serviceability
- Cornea enables the extended teams to effectively communicate among stakeholders to identify design constraints at early stage.
- Bottlenecks identified and resolved at early stage

- **Standard Operating Procedure Training:**

Objective

How to capture knowledge about complex procedures from highly experienced operators and utilize data to:

- Show operator recommended procedures and verify completed tasks
- Reduced errors and risk of delays due to interruption of workflow

Benefits

- Interactive on the job training and assessment thru AR assisted platform
- Reduce learning curve - either inexperienced in the industry or with a particular process
- Reduce errors in assembly for highly customized production environments
- Provide real time feedback during training sessions

Augmented Reality Application:

- **Parts Catalogue and Ordering:**

Objective

- How can dealers / personnel / service engineers / customer easily identify the parts mounted on the equipment to
- Increase direct customer engagement
- Enhance product maintenance and shopping experience

Benefits

- AR-assisted parts catalog enables easy identification of parts with the help of overlaid digital models
- Integrated with parts database; lower risk of using out-of-date data
- Interactive and intuitive with better visualization through CAD models

- Reduce downtime; improve efficiency of equipment

- **Virtual Showroom:**

Objective

Enhance product shopping experience and personalization strategies to increase customer engagement

Benefits

- Personalization strategies for high engagement with brands and products
- Customers can evaluate products prior to their release or availability
- Use descriptive / predictive analytics strategies to learn & provide valuable insights to salesperson to engage with customers better
- No need to carry full catalogs or eliminate additional inventory at dealerships

- **Remote Assistance:**

Objective

- How to expedite troubleshooting process to reduce the downtime?
- Realistic visualization of remote equipment to accelerate failure assessment

Benefits

- AR-assisted remote visualization platform enables field service personnel to communicate with experts more effectively
- Share visualization space and overlay instructions / comments on display device
- Collaborate / conference multiple end users dealing with similar issues to ensure quality of various tasks performed simultaneously
- Reduce downtime and improve efficiency (Man & Machine)

ROLES AND RESPONSIBILITIES

- Involved in Multimedia Team to model 3D assets.
- Creating shaders and materials in unity3d for VR Applications
- Involved in Model Design and Menu UI Design.
- Work along with the Total Team towards the completion and submission of a Production.
- Organizing 3D assets and texture into manageable library.
- Good team supporter for developing AR/VR/MR applications.
- Extensively involved in converting polymetric data (CAD) into polygon mesh.
- Deeply involved in creating animations.

AWARDS, CERTIFICATES, HOBBIES, INTEREST AND STRENGTHS

- Quick learner with good analytical and problem-solving skills, motivated to succeed with the desire to tackle challenging problems.
- An energetic and focused team player and leader with ability to build cohesive, productive teams.
- Strong interpersonal and communication skills with ability to maintain effective working relationships.
- A result-oriented person willing to relocate anywhere.
- Active in technical forums which relevant to the department discipline.
- Update the new technology skills day by day basis.

- Deep interest in doing animations which related to engineering and automotive sectors
