EDUCATION

Sri Venkateshwara College of Engineering | B.E – Automobile Engineering
Chennai | 2013 - 2017

WORK EXPERIENCE

IDP Education | Associate Technical Lead

July 2023 – present

- Leading a team of Eight software developers in designing, developing and maintaining the project based on **microservices equipped with event driven architecture on AWS** and Identify and resolve technical challenges and bottlenecks, ensuring on-time project delivery.
- Collaborate with Product owners, Product manager, Business analyst to **define the technical requirements**, prioritize task and create project roadmaps.
- Work with the solution architects to architect and design software solutions, ensuring scalability, performance and maintainability.
- Mentoring team members, conduct the code reviews and provide technical guidance to foster professional growth.
- Implementing Agile methodologies, leading daily stand-ups, involving in product backlog refinement, sprint planning and retrospectives

IDP Education | Senior Software Engineer

July 2022 – July 2023

- Contributed to the end-to-end development of **FastLane - Undergraduate program** and remained as a point of contact for the project which helps and guides the undergraduate students throughout the world to pursue their postgraduate degree in international universities abroad by writing **high quality codes** along with security compliance and conducting thorough code reviews.
- Collaborated with cross-functional teams to gather requirements and ensure project success.
- Acted as a **subject matter expert** for the project architecture, design and development and also provided technical guidance to the colleagues.
- Interacted with counsellors across India to understand their pain point and provide solutions which added value to the business goals.
- Actively involved in taking session on various technological topics across different forums within the organization.
- **As a recognition to my contribution to AWS/Python team I was given an opportunity to lead the Python/AWS Community of Practise.**
- **Front runner of the employee of the quarter award in 2023**
- **Selected for a 3 Month pilot project called Innovi - fi. An R&D initiative for emerging technology and product innovation for IDP products in the field of Generative Artificial Intelligence**

INNOVI – FI | R&D initiative

- Identified a problem and created a product to solve that problem by talking to customers, completing surveys, and using market research on **Large Language Models**.
- Applied creativity and innovation to figure out whether the product could be the solution and tested whether the solution product is viable, worth pursuing and liked by the target users.
- Identified goals and themes for development and solved the most important challenges to legitimize the product concept.
- Created a minimum viable product (MVP) as a POC using GenAI large language models, an initial version that has only enough function to meet its customer's purpose. A minimum viable product along with a **holistic solution using LLMs**.
- Collected customer feedback to continue expansion and enhancements, keep growing the product roadmap and set new strategic goals for the product.

IDP FastLane Product | Sr. Software Engineer

Lead as the **primary point of contact** and subject matter expert for the Fastlane product in IDP involving from solution discovery phase to the product deployment phase. This product has received **5x times** faster improvement in the overall product performance.

IDP Education | Software Engineer

Jan 2022 – July 2022

- Worked on **FastLane-Postgraduate** and implemented new features, resolved bugs and optimized performance.
- Demonstrated a commitment to continuous learning by acquiring expertise in **Python** and **Amazon Web Services (AWS)**
- Writing scalable codes with utmost reusability and standards
- Hands on experience in working with AWS resources like **Lambda**, **API gateway**, SQS, SNS, EC2, etc
- Experience in deploying AWS resources via **terraform** and usage of software like **boto3**.

Accenture Solutions Pvt Ltd., Chennai | Software Engineer

Jan 2020 – July 2021, July 2021 – Jan 2022 | Senior Software Engineer

- Revamped an existing application with a newer one based on the user requirement with **Python** and GUI.
- Worked in critical projects as Python Developer in the automation team and transformed most of the existing manual process which saved about 40% time leading to the increase in delivery of 5%
- Constructed a chatbot using **Kore.ai platform** with NLP, AI and ML functionalities for the project purpose out of own interest.
- Automated the manual assessment process within the project with the help of **sharepoint** tool integrating the code in the backend and Automation of the manual **document reviewing process** using Python by which it facilitates automatic reviewing of documents based on the checkpoints provided by the business user.
- Delivering each version of the application on time, based on the Global regulatory Compliance (GRC) methodology with utmost efficiency.

Accenture Solutions Pvt Ltd., Chennai | Associate Software Engineer

July 2017 – Dec 2019

- Played the role of **Compliance (QA) Analyst** by testing and reviewing of Change requests as a part of application support process.
- Validating various documents like Design specifications of an application, Installation documents, Test scripts as per the standard operating procedure
- Conducting Audit reviews across all the projects and providing sessions on **Computer System Validations** and **Life Sciences**
- Project management activities like coordinating the client level meetings, creating Standard Operating Procedures (SOPs) and work instructions for entire application.
- Generating fortnight based reports to the clients based on the performance of the project and tried to improve the efficacy of the projects based on outcome.
